Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS I want to pay off my bank liabilities, but the fixed interest loops are draining my monthly income.	THINKS Will the bank sue me? Is there any safe reduction model or scheme available for my specific condition?
(Borrower)	
DOES Tracks expenses manually on rough sheets; attempts to negotiate verbally with collection recovery agents.	FEELS Overwhelmed, completely helpless, anxious about asset safety, and isolated due to debt accumulation.
