

Project Demo Planning

Date	07 July 2026
Team ID	SWTID-2026-2950
Project Name	Finrelief (AI Powered Debt Relief & Financial Recovery Platform)
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem	Hooking the judges by explaining why debt recovery is broken and how FinRelief fixes it.	0.5 min	Lakshay Jain
2	User Profile & Financial Dashboard	Provides a centralized dashboard displaying the user's financial profile, debt summary, account details, and access to AI-generated history and recommendations.	1.5 min app.	Lakshay Jain
3	Debt Management	Allows users to add, edit, delete, and monitor multiple debts with details such as creditor, amount, interest rate, due date, and payment status.	1.5 min app.	Lakshay Jain
4	AI Settlement Analysis	Uses AI to analyze the user's financial profile and outstanding debts to generate customized settlement and repayment recommendations.	0.5 min app.	Lakshay Jain
5	AI Financial Advisor	An AI-powered chatbot integrated with Google Gemini that provides personalized financial advice, answers debt-related questions, and recommends recovery strategies based on user inputs.	0.5 min app.	Lakshay Jain
6	Hardship Letter Generator	Automatically generates professional hardship letters for creditors using AI based on the user's financial situation and debt information.	1 min app.	Lakshay Jain

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Start with a strong hook about financial stress. Briefly state the project objective and introduce the team.
2	Solution Overview	Use a simple architecture diagram to show how our web app interacts with the AI model.
3	Live Feature Demonstration	Run a real-time scenario: input sample debt data, generate an AI recovery plan, and show UI updates.
4	Q&A Session	Keep responses confident, short, and split the questions based on who coded that specific module.
