

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	WTID-2026-2950
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A distressed borrower trapped under heavy unmanageable credit card or banking liabilities.	Secure a formal, legal compromise lump-sum debt settlement directly with my bank.	I completely lack the professional business or legal vocabulary needed to negotiate with them.	Banks use rigid, flat recovery grids and aggressive third-party collection channels.	Overwhelmed, isolated, and anxious about my family's asset safety and financial future.
PS-2	A defaulting bank customer trying to track active debt levels and calculate safe compromise steps.	Analyze my financial data and understand whether I qualify for structured hardship relief.	I do not possess objective analytical resources or a system to compute precise cash stress tiers.	Traditional portals lack borrower-centric guidance and fail to save past calculation metrics cleanly.	Helpless, confused by compounding math, and deeply stressed during sudden financial crises.
